

Muhammad Ahmad Ali

Lahore, Pakistan | [+923344698152](tel:+923344698152) | [GitHub \(mvahmadali\)](https://github.com/mvahmadali) | ahmedbinnavid@gmail.com

Experience

Associate Software Engineer | [Just Dev It \(JDI\)](#), Lahore, Pakistan 05/2025 – Present

- Developed frontend interfaces for a healthcare project using React Native, integrating RESTful APIs for real-time data synchronization.
- Built frontend screens for an e-commerce project in React Native, implementing API integrations and developing a back-office management application using React for administrative operations.
- Implemented CRUD operations, data validation systems, and multi-step workflow components across multiple product features as per requirements.
- Collaborated with cross-functional team to deliver user-facing dashboards while developing modular, reusable components and maintaining clean code architecture

Intern | [Just Dev It \(JDI\)](#), Lahore, Pakistan 01/2025 – 04/2025

- Refactored more than 20 React components from JavaScript to TypeScript and updated component data to meet client specifications.
- Went through a short training on AI, studying deep learning architectures (ANN, RNN, LSTM, GRU, Transformers) through Jay Alammar's resources and "Attention Is All You Need" paper, then assisted in healthcare chatbot development via data scraping and training implementation

Final Year Project Collaboration | [Punjab Safe Cities Authority](#), Lahore, Pakistan 10/2024 – 12/2024

- Designed and trained ML models for AI-based accident, identification and classification. Worked on enhancing model accuracy by various techniques.
- Explored potential integration with **Safe City surveillance infrastructure**, assessing feasibility for large-scale deployment.

Projects

Portfolio [↗](#) | [React](#), [GSAP](#), [React Three Fiber](#), [Three.js](#), [React Three Drei](#), [Tailwindcss](#),

- Developed an interactive portfolio website demonstrating my work and technical expertise using React with GSAP for smooth animations and scroll-triggered effects, integrating Three.js for 3D elements and interactive canvas to showcase my projects.

CrashAnalytix : AI-Powered Traffic Accident Analysis System (FYP) | [OpenCV](#), [Labellmg](#), [EasyOCR](#), [MongoDB](#), [Flask](#), [React](#), [jsPDF](#), [Tailwind](#)

- Developed an end-to-end AI system for automated accident detection using YOLO object detection, incorporating severity classification, license plate OCR, and automated PDF report generation. Built a full-stack web application with React and Flask to demonstrate the complete accident analysis workflow, achieving 96% mAP in accident detection, 96% entity classification accuracy, 86% severity classification accuracy, and 89% license plate recognition accuracy.

Education

Forman Christian College (A Chartered University) 2021 – 2025

BS (Hons) Computer Science | Lahore, Pakistan

CGPA:3.356

Skills & abilities

Development | [React](#), [GSAP](#), [Tailwind CSS](#), [Three.js](#), [React Three Fiber](#), [React Three Drei](#), [React Native](#), [Express](#), [Node](#), [MongoDB](#).

Misc | [SQL](#), [Python](#), [Wordpress](#), [Html](#), [CSS](#), [GitHub](#), [MS Office](#).
